

**Flight Line Ops (FLO) or North 40.** Two years ago we started volunteering in this area, and everyone seemed to have a good time. We plan to schedule people there again this summer, but you must volunteer and you must be 16 to volunteer.

This is the area north of our camp and across the road. You see this area when you go to the showers. This is the area where factory built planes park for AirVenture. They park under power, like they do in Area 51, but the area is much larger.

The shifts are 3 hours long but food and drinks will be provided by Operation Thirst. The first shift is 6:40 am - 9:45 am. You will not be able to have breakfast in our camp, but at Operation Thirst. The next shift is 9:30-12:35. You will be able to return and have lunch in our camp if you want. The next shift is from 12:20 - airshow (around 3pm). You will have to eat lunch before this shift. They do not work during the air show. The final shift of the day is 5:40 - 8:05 pm. You will have to eat dinner before you start your shift.

If you volunteer, you will still be scheduled in the Hombebuilt parking area on other days.

Email me if you want to volunteer for some of these shifts.
